Both the Frames and Blades of our Star Hack Saws are now as perfect as human skill can make them. The Frame is steel, polished and nickel-plated, and will hold all Blades from 3 to 12 inches, and face them in four directions. With the extra Clamp, as seen in the cut, all broken Blades can be used. These Saws have a file temper, and one five-cent Blade will cut iron or soft steel steadily for several hours, doing more work than a dollar's worth of files.
